Allowable Subject Matter

1. Claims 1-14 are allowed.

The following is the statement of reasons for the indication of allowable subject matter: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, ***all*** the limitations of the independent claim(s) (claim 1), particularly a storage system that comprises a plurality of channel units communicatively coupled to an upper-level system, a cache unit communicatively coupled to the plurality of channel unit(s), a control unit communicatively coupled to the cache unit, a disk device communicatively coupled to the control unit, wherein the number of paths linking said channel unit to said cache unit equals the number of plurality of channel units, i.e., there is no multiplexing between the channel units to store data on the cache unit, but instead each channel unit has a dedicated path to the cache unit and the necessary logic in the cache unit in order enable these independent paths to store data on the cache.
